The WoodPro Solution

Involved in wood procurement? WoodPro™ offers a customizable unified inventory and market mapping application suited for your operational needs.

Why Choose WoodPro?

- Simplifies and customizes timber sale planning, tracking, and reporting for procurement foresters and timberland managers.

- Applies to diverse operational needs with flexibility in workflows, data management, and reporting for multi-scale forestry operations.

- Assists with compliance requirements, reporting, and environmental accountability.

Technology Platform

- WoodPro™ provides a map-centric, customizable application with visualization tools that allows for quick decision-making, operational efficiency, and collaboration.

- Easily and securely accessible from a browser.

Supports EUDR, FSC, and SFI compliance with precise wood lot geolocation, sustainability tracking, and data integrity

Incorporate geospatial data layers, including:
- Vegetation
- Endangered species
- Parcel Data
- Soil

Sensitive data such as ownership records and operational details secured through role-based permissions
